“We are happy to be working with NATCOM, our partner in Egypt for over two years now.”

NATCOM started their operation in 1989 in the field of Machinery Asset Management. Their headquarters is located in Cairo which serves as the main hub for their operations with their long standing clients from almost every sector. Their excellent performance bundled with a long track record of Hi-tech products, on-site services and field training, has made NATCOM the client’s favorite choice.

Today, Mr. Khairy Arsanios, the Director of NATCOM together with his high skilled team, is continuously bringing Steamloc’s unique technology to the Egyptian market by opening new opportunities and establishing a powerful message about Steamloc in the Industrial Environment.
